ADIVI
add digital information to video

ADIVI 3.0 is a hypervideo- and rich-media-application, which enables you to create interactive videos.

▶ No media discontinuity

You can integrate every desired information within a video. No search of files, websites or information details. All information in one video!

### ▶ Interactive knowledge transfer

ADIVI videos are interactive – so they achieve people individually. Viewers are able to decide which information they like to obtain according to their level of knowledge and interest. This active participation guarantees faster learning success and higher sustainability.
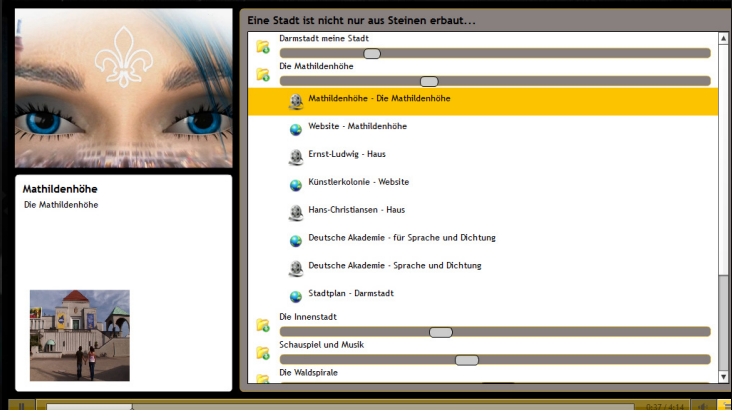

▶ Everything and everybody !

ADIVI hypervideos are suitable for all areas where videos are used. As from now, you can fastly create interactive videos independently and by your own. It´s just that simple! Not convinced? Test ADIVI online now...

▶ One step ahead

You want unique feature and like to adequately communicate your information? Do you want to merge the benefits of websites and videos? ADIVI is one step ahead – the next step is up to you!
